

## ATM Application

**Description:** A local bank wants an application where customers can perform basic banking operations like withdrawals, deposits, and balance inquiries. The application should allow users to interact using the following menu:

1. **Deposit Money:** The user can deposit any amount into their account.
2. **Withdraw Money:** The user can withdraw money, provided they do not exceed their balance or any set daily withdrawal limit.
3. **Balance Inquiry:** The user can check their current account balance.
4. **Mini Statement:** Displays the last 5 transactions.

### Sample Input 1:

Operation: Deposit

Amount: 2000

### Output:

Transaction successful. New balance: 8000 Rs.

### Sample Input 2:

Operation: Withdraw

Amount: 1000

### Output:

Transaction successful. New balance: 7000 Rs.
